

## INDEX

## Volume 19 numbers 1-10

## January/February — December 1987

## SUBJECT INDEX

- A**  
 A CAGD theme: geometric continuity and shape parameters 566  
 Advanced manufacturing systems 508  
 Algorithm for incremental compaction of geometrical layouts 257  
 Algorithm for splitting planar surfaces 293  
 Algorithms 58, 122, 293, 299, 338, 475, 479  
 Algorithms for generating improved images of curved surfaces by distributing errors along Hilbert's curve 299  
 Algorithms for integrated calculation models and drafting in building services pipework design 479  
 Ambiguities 141  
 Analytical approach to intersection of all piecewise parametric rational cubic curves 282  
 Application of structural optimization using finite elements 148  
 Approach to solving the compatibility problem between GKS and PHIGS 456  
 Approach to spur gear design 555  
 Approximating a composite cubic curve by one with fewer pieces 539  
 Aspects 396  
 Assembly components 35  
 Assembly modelling 65  
 Automated assembly 3  
 Automatic assembling procedure generation from mating conditions 3  
 Automatic parametrization of rational curves and surfaces I: conics and conicoids 11  
 Automatic parametrization of rational curves and surfaces II: cubics and cubicooids 499
- B**  
 Beam-column connections 115  
 Bearing selection 361  
 Bézier quartics 77  
 Bézier rectangles 25  
 Bézier triangles 25  
 Blade geometry 251
- BOOKS AND PUBLICATIONS**  
 Ammeraal, L Computer graphics for the IBM PC 515  
 Collier, Y (ed) The international computer graphics directory 159  
 Crestin, J P and McWaters, J F Software for discrete manufacturing 331  
 Encarnacao, H, Schuster and Voge Product data interfaces in CAD/CAM applications: design, implementation and experiences 158  
 Enderle, G, Grave, M and Lillehagen, F Advances in computer graphics I 103  
 Engelke, W D How to integrate CAD/CAM systems 386  
 Farin, G E (ed) Geometric modeling: algorithms and new trends 512  
 Gardan, Y Architectural design and CAD 331  
 Gardan, Y (ed) Numerical methods for CAD 47  
 Giannesini, F, Kanoui, H, Pasero, R and van Caneghem, M Prolog 219  
 Hearn and Baker Computer graphics 513  
 Hopgood, F R A, Duce, D A, Gallop, J R and Sutcliffe, D C Introduction to the Graphical Kernel System (GKS) 386  
 Hopgood, F R A, Hubbard, R J and Duce, D A (eds) Advances in computer graphics II 159  
 Kennedy, E L CAD: drawing, design, data management 330  
 Kunil, T K (ed) Advanced computer graphics 46  
 Mattiason, K, Samuelsson, A, Wood, R D and Zieniewicz, O C (eds) NUMIFORM 86: numerical methods in industrial forming processes 103  
 Rooney, J and Steadman, P Principles of computer-aided design 387  
 Samad, T A natural language interface for computer-aided design 330  
 Stark, J What every engineer should know about: CAD/CAM applications 46  
 Sugihara, K Machine interpretation of line drawings 387  
 van Wijk, J J On new types of solid models and their visualization with ray tracing 514  
 Woodwork, J R Computing shape 219
- Boundary representations 141, 293  
 Building design 523  
 Building services engineering 226  
 B-splines 122, 305
- C**  
 CAD modelling programs 226  
 CAD system 479  
 CAD/CAM 233  
 CGI 245, 444, 451  
 CGM 425, 431  
 Circuit design 15  
 Circuits 226  
 Civil engineering 171  
 Compaction algorithm 257  
 Compatibility 456  
 Components 65  
 Composite block philosophy 571  
 Computational geometry 503  
 Computer-aided drafting 226  
 Computer-aided drawing 503  
 Computer-aided engineering 361, 368  
 Computer-aided geometric design 282, 310  
 Computer-aided layout 131  
 Computer-aided layout of chemical plant: a computational method and a case study 131  
 Computer-aided manufacturing 3, 323, 560  
 Computer-aided planning 188  
 Computer-aided visual impact analysis 197  
 Computer graphics 396, 431, 444, 451  
 Computer technology 193, 203, 212, 266, 299, 466  
 Computing offsets of B-spline curves 305  
 Conceptual aspects of transformation invariance 475  
 Conformance 245  
 Conformance specification in the CGI 245  
 Conicoids 11  
 Conics 11  
 Connectivity 226, 479  
 Considering cost effective computer-aided mechanism design 534  
 Constituency profiles 245  
 Constructive solid geometry 527  
 Constructive solid geometry representations 338  
 Control points 305  
 Control systems 466  
 Conversion from Bézier rectangles to Bézier triangles 25  
 Coordinates 396  
 Cost effectiveness 534  
 Criteria: a package for computer-aided control system design 466  
 Cubic curves 58, 282  
 Cubics 499, 539  
 Curve and surface construction using rational B-splines 485  
 Curved surfaces 299, 535  
 Curves 11, 77, 475, 499, 539  
 Curves and surfaces 485
- D**  
 Data structure 65  
 DC characteristics 380  
 Decision models 523  
 Design process 361  
 Drawing natural scenery by computer graphics 212
- E**  
 Edge-edge relationships in geometric modelling 237  
 Efficient routing algorithm 375  
 Electrical wires 28

# Index

Electronic computer document 431  
Elimination 282  
Empirical model 380  
Encodings 425  
Expert systems 361  
Expert systems applied to mechanical engineering design — experience with bearing selection and application program 361

**F**  
Fatigue damage 95  
Fatigue life predictions 95  
Fatigue life predictions on microcomputers 95  
Finite difference method 310  
Finite element analysis 148  
Finite element method 310  
Form errors 368  
Functions 425, 535

**G**  
General cubic curve fitting algorithm using stiffness coefficients 57  
Geometric ambiguities in boundary representations 141  
Geometric modelling 237, 485  
Geometry 11, 25, 141, 323, 499, 539  
Geometry of 2D components 323  
GKS 396  
Graphical data storage 425  
Graphics 212  
Graphics standards 396, 410, 418, 425, 436, 444, 451, 456  
Graphics workstation 193

**H**  
Hardware algorithm for net extraction 347  
Hardware algorithms 347  
Hidden surface algorithm 527  
Hilbert's curve 299

**I**  
IGES 436  
Illumination model 535  
Illumination models for generating images of curved surfaces 535  
Implementations 396  
Influence of surface shape in admissible tool positions in 5-axis face milling 233  
Integrated information interchange infrastructure 431  
Integration of calculation models and CAD systems in building services design 226  
Interactive microcomputer-aided design of shop-welded and field-bolted beam-column connections 115  
Interpolation 77  
Intersection algorithm 282  
Issues raised by the PHI—GKS approach 464

**L**  
Landscape architecture 188  
Landscape design 203  
Landscape planning 171, 197  
Landscape representation 212  
Language and data stream binding 245  
Language bindings 418  
Lines and circles 503

**M**  
Mating conditions 3  
Mechanical engineering design 361

Metafile 425  
Method to approximate the space curve of least energy and prescribed length 73  
Microcomputers 95, 115  
Microcomputer-aided PCB design 375  
Minimum average deviation 368  
Modelling DC characteristics of MOSFET 380  
Modelling the cityscape with geometry engines 193  
Molecular dynamics 91  
MOSFET 380

**N**  
NC machining 85  
NC machining of free form surfaces 85  
NC programming 233  
Net extraction 347  
Neutral formats 436  
Neutral formats for product data exchange: the current situation 436  
New approach for evaluating form errors of engineering surfaces 368  
Newton-Raphson iteration 65  
Nodes 479  
Numerical control 323  
Numerical evaluation of shear strength of structural masonry assemblages 355  
Numerical model 355

**O**  
Offset technique 305  
On speeding up ray tracing of B-spline surfaces 122  
Operational primitives 338  
Optimization 35  
Optimization algorithm 251  
Optimization of geometry described by curves 251  
Optimization scheme for assembling components 35  
Oversize 15

**P**  
Parameters 380  
PHIGS 410  
PHI-GKS 456  
Pipework networks 479  
Planar faces 293  
Plant design 131  
Polyhedra 237  
Primitives 396  
Product definition data 436  
Professional updating courses 508  
Professional updating courses for the manufacturing industries 508  
Programmer interface standards 418

**Q**  
Quadrees 266

**R**  
Rational B-splines 485  
Ray-tracing 122  
Ray-casting 527  
Receptor targetting 91  
Rectilinear polygons 15  
Relations and transformations between quadtree encoding and switching function representation 266  
Resolvants 282  
Resultants 282  
Robust computation of tangent lines and circles 503

Routing algorithm 375

**S**  
Sculptured surface machining 233  
Set operations 293  
Shading model 535  
Shape synthesis 237  
Shear stresses 355  
Ship building 560  
Ship design 560  
Simulation 91, 212, 523  
Single plane of weakness theory 355  
Solid modelling 28, 338, 527  
Solid modelling of electrical wires on a computer graphics display screen 28  
Solid synthesis environment 338  
Space curve approximation 73  
Special Bézier quartics in three dimensional curve design and interpolation 77  
Splines 73  
Spur gears 555  
Stacked frame buffer algorithm for fast recovery of solid synthesis process 338  
Structural assemblages 355  
Structural optimization 148  
Subroutine package 534  
Surface definition 85  
Surface geometric description 233  
Surfaces 11, 25, 310, 475, 499  
Switching function representation 266  
System for interactive assembly modelling 65  
Systolic algorithm 15, 347  
Systolic algorithms for rectilinear polygons 15

**T**  
Tangent constructions 503  
Terrain modelling 171  
Terrain modelling in surveying and civil engineering 171  
The Graphical Kernel System (GKS) 396  
Thermal behaviour 523  
Three dimensional modelling and model management applied to ship design 560  
Training and education 555  
Transformation invariance 475  
Translation 475  
Trees 226, 479  
Troposkien 251  
Two dimensional components 323  
Two layer routing 375

**U**  
Undersize 15  
Use of decision models under uncertainty in thermal design 523  
Use of structural analogy in generation of smooth surfaces for engineering purposes 310  
Using CAD to design receptor targetting of potent drugs 91

**V**  
View from practice 203  
Visual impact analysis: a case study of a computer-based system 197  
Visualization 188, 193, 197  
Visualization algorithm for CSG polyhedral solids 527  
Visualization tool for (landscape) architects 188  
VLSI layout 257

## AUTHOR INDEX

- A**  
 Abhyankar, S S and Bajaj, C Automatic parametrization of rational curves and surfaces I: conics and cuboids 11  
 Abhyankar, S S and Bajaj, C Automatic parametrization of rational curves and surfaces II: cubics and cuboids 499  
 Abuelma'atti, M T Modelling DC characteristics of MOSFET 380

---

Vijayasimha, C R see Madhusudan, G

## W

Wakeling, A see Ward, P

Ward, P, Patel, D, Wakeling, A and Weeks, R  
Application of structural optimization using  
finite elements 148

Weeks, R see Ward, P

Westberg, S see Bjorkenstam, U

Westberg, S K E Optimization of geometry  
described by curves 251

Williams, C J K Use of structural analogy  
in generation of smooth surfaces for  
engineering purposes 310

## Y

Yamamoto, T see Guo, B

Yang, C-G Illumination models for

generating images of curved surfaces 544

Yang, C G see Griffiths, J G

Yang, C-G On speeding up ray tracing of  
B-spline surfaces 122

## Z

Zmeureanu, R and Fazio, P Use of decision  
models under uncertainty in thermal design  
523
